

Current Luxury MyCurtains smart phone app is available for iOS and Android devices, and works with all Zigbee Current Luxury and Current Products Corp. devices and Zigbee QMotion Rollershades. The app provides unparalleled control over devices by allowing users the ability to create groups, scenes, and schedules.

DEVICES

Provides individual control over each device on the network. There is a max of 100 devices a user can add to one hub before being required to add additional hubs to the account.

GROUPS

Allows users to create "groups" for simultaneous control over multiple devices. There is no maximum number of devices in a group, nor is there a maximum number of groups.

DASHBOARD

Favorited devices, groups, and scenes will show up on the "dashboard" for convenient control.

SCHEDULES

Allows users to set schedules for devices, groups, and scenes. Users can set actions for specific times, or for sunrise and/or sunset.

SCENES

Allows users to define specific actions for specific devices or groups, then users can simply trigger a "scene".
