

## Sensor Box

The Current Luxury Sensor Box is installed on the wall near the window, in-line between the motor and the Pendant. The sensor box allows fully automatic or semi-automatic opening and closing based on triggers from the integrated light and temperature sensors. Sensor boxes can be installed on single or dual tracks, and when installed only require secondary motors.

## DIMENSIONS

## COMMUNICATION PROTOCOL

Zigbee	802.15.4
FM	434.625 MHz 2FSK

## FEATURES

Light Sensor	Off   Fully Automatic   Semi-Automatic
Temperature Sensor	Off   Fully Automatic   Semi-Automatic
